Environmental Science - Remediation Specialist
State of Montana - Fort Harrison, MT

Remediation Specialist needed
to manage multiple, complex, multi-disciplinary, multi-year remediation sites. Plans, coordinates, and directs interdisciplinary technical studies, design and construction plans. Never a dull moment in this position, responsibilities also include reviewing and evaluating cleanup alternatives and communicates with a variety of audiences including the public, regulators, Army Corps of Engineers and Department of the Army.

Must be able to pass a security background check as a condition of employment.

Must have demonstrated ability to work and engage in diverse working environments within and outside the Department.

Qualifications:

Bachelor's Degree in Environmental Science, Environmental Engineering or closely related field AND three years of job-related work experience.

Physical and Environmental Demands:
Work is performed both in an office environment and in the field. Requires periodic statewide travel for site visits and meetings. Fieldwork requires average strength and stamina, the ability to work in adverse weather conditions, considerable walking on uneven terrain and potential exposure to unexploded ordinance.

Knowledge, Skills & Abilities:
Knowledge of environmental program principles and procedures applicable to a wide range or duties in program or functional areas, such as unexploded ordnance, installation restoration and remediation, contaminant fate and transport, solid and hazardous waste management, and eMS and ISO 14001 standards. Effective written and verbal communication and problem solving skills.

Skilled in applying environmental program knowledge to resolve complex problems involving diverse aspects of environmental protection (i.e., investigations, inspections, environmental oversight, etc.) where procedures require frequent modification or changes in the state Army National Guard program or requirements.

Ability to modify or adapt established environmental methods and procedures to solve problems; ability to evaluate, modify or adapt new methods to meet environmental requirements for specific state situations; and/or ability to revise standard methods to improve or extend environmental administration and/or management systems within the state.

Applicant Pool Statement:

If another department vacancy occurs in this job title within six months, the same applicant pool may be used for the selection.
