Soils and Overburden Charter

Background:

The Soil and Overburden Technical Division of the ASMR includes professionals involved in all aspects of mining who are interested in the use and management of earthy materials associated with mining.

Scope and Objectives:
1. To promote good reclamation.
2. To provide a forum for discussions and exchange of information on soils and overburden.
3. To assure that our profession is involved in reclamation regulations, planning, implementation, and enforcement.
4. To help educate the public with respect to the need for mining and the opportunities for reclamation.
5. To cooperate with the other ASMR technical divisions to further our common goals.

Committees:

Subcommittees will be called on an as-needed basis.

Chair’s Responsibilities:
1. Review papers submitted for the annual meeting.
2. Chair the TD session of the annual meeting.
3. Chair the annual TD business meeting.
4. Serve as conduit for information exchange among members of the TD and with the NEC.
5. Arrange for chair replacement when stepping down.
