PROCEEDINGS

Thirteenth Annual Meeting
American Society for Surface Mining and Reclamation

SUCCESSES AND FAILURES: APPLYING RESEARCH RESULTS TO INSURE RECLAMATION SUCCESS

May 18 - 23, 1996 - Knoxville, Tennessee

Published by ASSMR and the Powell River Project of Virginia Tech
PROCEEDINGS

Thirteenth Annual Meeting
American Society for Surface Mining and Reclamation

SUCCESES AND FAILURES: APPLYING RESEARCH RESULTS TO INSURE RECLAMATION SUCCESS

May 18 - 23, 1996 - Knoxville, Tennessee

Co-Editors:

W. Lee Daniels, James A. Burger, and Carl E. Zipper
Departments of Crop and Soil Environmental Sciences and Forestry
Virginia Tech, Blacksburg, Virginia, USA, 24061

Coordinators:

Sue Brown and Julia Burger
Department of Crop and Soil Environmental Sciences
Virginia Tech
Coal surface mining in Southwest Virginia. Original drawing by J. Michael Schmidt.

This volume contains presentation papers and abstracts from the 1996 Annual Meeting of the American Society for Surface Mining and Reclamation (ASSMR) held May 18 - 23, 1996, in Knoxville. Paper presentation here does not preclude authors from pursuing publication in other outlets. These Proceedings should be cited as:

Sponsors of the 13th Annual National Meeting of ASSMR

We appreciate the generous support of the following sponsors:

The Tennessee Valley Authority

Virginia Polytechnic Institute and State University
  Powell River Project
  Dept. Of Crop and Soil Environmental Sciences

USDI - Office of Surface Mining

1996 Annual Meeting Program Committee

Releveling and Behavior of Strap Retrofitted Damaged Test Foundations Exposed to Mine Subsidence.
Gennaro G. Marino ................................................................. 146

David Brook ........................................................................... 163

Repair of the Czar Shaft Sinkhole.
J. David Deatherage, Jack Starkey, Nils Gustavson ......................... 175

Monitoring of a House During Mining Subsidence.
G. Lin, E.C. Drumm, R.M. Bennett, L. Powell ............................... 184

Using GIS and Numerical Modeling to Assess Subsidence Over Abandoned Mines.
Kevin M. O'Connor, John A. Siekmeier, Jan Stache ....................... 204

Mine Design: The Long Term Effects of High Extraction Mining.
Paul W. Jeran. ............................................................................ 217

Error Correction for Vertical Surveys Conducted Over a Subsiding Longwall Mining Panel.
D. Allen Hughes ......................................................................... 234

A History of Metal Shaft/Portal Closures in Utah.
Louis A. Amodt .......................................................................... 242

SESSION 4: MINE-SLOPE STABILITY

Application and Analysis of Anchored Geosynthetic Systems for Stabilization of Abandoned Mine Land Slopes.
Stanley J. Vitton, M. Frank Whitman, Wendell Harris, Robert Y. Liang ......................................................... 256

Maximum Safe Slope Angles for Proposed Shiplock Slopes of Three Gorges Dam Site Based on Kinematic Analyses Performed on Major Discontinuities.
Jeong-gi Um, Pinnaduwa H.S.W. Kulatilake, Jianping Chen, Jianren Teng ......................................................... 267

Clyde R. Tant, Eric C. Drumm, Matthew Mauldon, Richard M. Berry ......................................................... 282

SESSION 5: ACID MINE DRAINAGE REMEDIATION

Hydrologic Investigation and Remediation of a Post-Remining Acidic Seep.
William W. Aljoe, Nile A. Linberg ................................................ 296

Water Quality Improvements Resulting from FBC Ash Grouting of Buried Piles of Pyritic Materials on a Surface Coal Mine.
Joseph Schueck, Mike Dimatteo, Barry Scheetz, Mike Silsbee ......................................................... 308

Arthur W. Rose, Jeralee Stalker, Louise H. Michaud ......................................................... 321
### SESSION 6: ACID MINE DRAINAGE PASSIVE TREATMENT - DRAINS

**Acid Mine Drainage Treatment with Open Limestone Channels.**  
Paul F. Ziemkiewicz, David L. Brant, Jeffrey G. Skousen

**An Apatite Drain: New Method for Iron and Aluminum Removal from Highly Contaminated Acid Mine Drainage.**  
Jung-Chan Choi, Terry R. West

**Assessment of the Applicability of an Anoxic Limestone Drain for a Surface Mine in East Central Tennessee.**  
Terry W. Schmidt, Robert S. Hedin, P.R. Lorello

### SESSION 7: SOILS AND OVERBURDEN

**Constructing Vegetation Productivity Equations by Employing Undisturbed Soils Data: An Oliver County, North Dakota Case Study.**  
Jon Bryan Burley, Kenneth J. Polakowski, Gary Fowler

**Productivity of Prime and Nonprime Topsoil Reclaimed in Equivalent Topographic Positions.**  
Gary A. Halvorson, M.V. Nathan

**A Methodology for Evaluating the Costs of Selective Handling of Overburden Materials.**  
T. Phipps, J. Skousen, J. Fletcher

**Selenite-Selenate Speciation in Mine Soils and Salt Solutions: A Comparison of Atomic Absorption Spectroscopy and Ion Chromatography.**  
Shankar Sharmasarkar, George F. Vance, Florence Cassel-Sharmasarkar

**Compaction Effects on Mineland Soil Quality.**  
Padam P. Sharma, Fredric S. Carter

**Availability of P and K in Restored Prime Farmland.**  
O. Semalulu, R.I. Barnhisel

### SESSION 8: REVEGETATION ECOLOGY

**The Potential for Using Wildflower Species to Increase Natural Habitat in Contour Surface Mine Reclamations.**  
John R. Heckman, Karen D. Holl, Mara Sabre, Robert B. Atkinson, John Cairns, Jr.
Predicting Grass Stand Adequacy from Early Stand Parameters.
R.E. Ries ................................................................. 462

Vegetation Diversity within Native and Reclaimed Coal Mine Sites: Environmental Factors and Seasonal Variability.
Brenda K. Schladweiler, George F. Vance ........................................ 472

Natural and Planted Flora of the Log Mountain Surface-Mined Demonstration Area, Bell County, Kentucky.
Ralph L. Thompson, Gary L. Wade, R. Allen Straw ............................. 484

The Relative Merits of Dolomitic and Calcitic Limestone in Detoxifying and Revegetating Acidic, Nickel- and Copper-Contaminated Soils in the Sudbury Mining and Smelting Region of Canada.
Derek McHale, Keith Winterhalder .................................................. 504

Ontogeny of Accidental Wetlands and Hydric Soil Development in Surface Mined Landscapes.
Robert B. Atkinson, W. Lee Daniels, John Cairns, Jr. .......................... 516

SESSION 9: CONSTRUCTED WETLANDS

Acidic Mine Drainage Abatement in an Anaerobic Sub-Surface Flow Wetland Environment - Case History of the Treatment System at Corsica, PA.
Jonathan M. Dietz, Dennis M. Stidinger ............................................ 531

Chemical Characterization of Iron Oxide Precipitates from Wetlands Constructed to Treat Polluted Mine Drainage.
Caryl L. Fish, Robert S. Hedin, Jonna Partezana ................................. 541

William W. Hellier ............................................................................. 550

Manganese and Trace Metal Removal in Successive Anaerobic and Aerobic Wetlands.
F.J. Sikora, L.L. Behrends, G.A. Brodie, M.J. Bulls ................................ 560

The Use of Overland Flow Wetland Treatment Systems to Remove Nickel from Neutral Mine Drainage.
Paul Eger, Jon Wagner, Glenn Melchert ............................................. 580

SESSION 10: MINED LAND REFORESTATION

The Use of Leguminous Trees in Reclamation of Tropical Mined Soils.
Luiz E. Dias, Ávilio A. Franco, Eduardo F.C. Campello, Sérgio M. de Faria .......................................................... 601

Organic Amendment Effects on Nitrogen and Carbon Mineralization in an Appalachian Minesoil.
R.D. Faulconer, J.A. Burger, S.H. Schoenholtz, R.E. Kreh .................... 613
Tree Shelter and Interplanted N-Fixing Shrub Effects on Crop Tree Growth on a Calcareous Minesoil.
David A. Kost, Merlyn M. Larson, John P. Vimmerstedt .................................................. 621

Evaluation of Natural Succession on Reclaimed Coal Mine Land in Western Kentucky.
Dan L. Williamson, R. Brent Gray ................................................................................................. 629

Influence of Grading Intensity on Herbaceous Ground Cover, Erosion, and Tree Establishment in the Southern Appalachians.
John L. Torbert, James A. Burger ................................................................................................. 637

SESSION 11: GEOCHEMISTRY OF ACID MINE DRAINAGE 647

Neutralization and Release of Metals Properties of Fly Ash.
Hrissi K. Karapanagioti, Asmare Atalay .................................................................................... 649

Adsorption of Acid Mine Drainage Metals on Fly Ash.
Hrissi K. Karapanagioti, Asmare Atalay .................................................................................... 659

Equilibrium Modeling of Trace Metal Transport from Duluth Complex Rockpile.
Paula D. Kelsey, Ronald W. Klusman, Kim Lapakko ................................................................. 671

Solubility of Fe (III) and Al in AMD by Modelling and Experiment.
Kevin G. Mitchell, Thomas R. Wildeman .................................................................................... 681

Pyrite Microencapsulation: Potential for Abatement of Acid Mine Drainage.
A.K. Seta, V.P. (Bill) Evangelou ................................................................................................. 690

Limestone Additions to Affect Changes in Loading to Remediate Acid Mine Drainage.
Frank T. Caruccio, Gwendelyn Geidel ....................................................................................... 695

SESSION 12: BYPRODUCTS AS SOIL AMENDMENTS 701

Soil Development in a Coal Waste, Slag and Sludge Artificial Topsoil Mix.
Justine A. Cox, Rob J. Whelan, Stuart C. Thompson ................................................................. 703

Acidic Minespoil Reclamation with AFBC By-Product and Yard-Waste Compost.
R.C. Stehouwer, W.A. Dick, R. Lal ............................................................................................. 713

Municipal Sewage Sludge and Phosphorus as Amendments for Minesoils on the Cumberland Plateau.
C.L. Walker, J.T. Ammons, R.W. Dimmick, J.H. Reynolds ....................................................... 728

A Reclamation Approach for Mined Prime Farmland by Adding Organic Wastes and Lime to the Subsoil.
Quiang Zhai, Richard I. Barnhisel ............................................................................................... 740
SESSION 13: LANDSCAPE REHABILITATION

Applying Geomorphologic Principles to Restore Streams Impacted by Surface Mining.
Michael S. Ellison ................................................................. 751

Reinterpreting SMCRA: "Permitting" Phased Postmining Land Use.
Zina R. Merkin, Thomas J. Nieman ...................................... 766

The Prospect of Gully Gravure on Reclaimed Hillslopes.
Terrence J. Toy, W.R. Osterkamp ......................................... 781

POSTER PAPERS AND ABSTRACTS:

SOIL AND OVERBURDEN TECHNICAL DIVISION

Jon Bryan Burley ........................................................................ 789

Crop and Soil Responses to Sewage Sludge Applied to Reclaimed Prime Farmland.
Q. Zhai, R.I. Barnhisel .......................................................... 813

Acid Mine Drainage and Minesite Salinity in Australia.
David J. Williams ........................................................................ 821

Organic Matter and Nutrient Accumulation in Reclaimed Kaolin Mine Soils of Georgia.

Plant Materials and Amendments for Controlling Wind and Water Erosion on a Fly Ash Disposal Area: TVA Colbert Fossil Plant, Alabama.
Jimmy J. Maddox, David Beheil, John M. Soileau, Jimmie Kelsoe ................................................. 822

Reclamation of Acidic, Denuded Copper Basin Land: Revegetation Performance of Phosphate Rock vs. Other Nutrient Sources.
J.M. Soileau, F.J. Sikora, J.J. Maddox, J.J. Kelsoe ......................... 823

Improved Methods for Acid Base Accounting Utilizing Geospatial Modeling.
Michael DiMatteo, Mark Gaylord .............................................. 824

FORESTRY AND WILDLIFE TECHNICAL DIVISION

Age and Site-Related Patterns of Carbon Allocation to Wood, Foliage, and Roots on Reclaimed Kaolin Mines in Georgia.
A. Legerski, R. Hendrick, E. Ogden .......................................... 825

Mycorrhizal Fungi + Trees—Practical Beneficial Tools for Mineland Reclamation.
C.E. Cordell, D.H. Marx, B. Jenkins ............................................ 825
GEOTECHNICAL ENGINEERING TECHNICAL DIVISION

Comparative Assessment of Groundwater Chemistry Evolution at Three Abandoned Mines and Its Practical Implications.
Jaroslav Šolc ................................................................. 826

Injection of Alkaline Ashes into Underground Coal Mines for Acid Mine Drainage Abatement.
William W. Aljoe ............................................................ 827

Closure of the Brewer Gold Mine by Pit Backfilling.
Anne Lewis-Russ, John F. Lupo, Jon Bronson, Joe M. Flynn, B.G. "Bud" Long ......................... 827

Leachate Generation, Qualitative Trends and Groundwater Contamination Potential in Dry Deposits of Fly Ash.
Jaroslav Šolc .................................................................... 828

Backfill Hydrologic Characteristics in a Tennessee Area Surface Coal Mine.
Charles G. Blackburn .......................................................... 829

Erosion Control on Tailings Dams Using Soil Bioengineering.
Moreen Miller ................................................................... 830

WETLANDS TECHNICAL DIVISION

WQEP - A Computer Spreadsheet Program to Evaluate Water Quality Data.
Robert G. Liddle ................................................................. 831

Limestone Drains to Increase pH and Remove Dissolved Metals from an Acidic Coal-Mine Discharge in Pennsylvania.
Charles A. Cravotta III, Mary Kay Trahan ................................. 836

Controlling and Monitoring Flow in Treatment Wetlands Using Weirs.
Thomas M. Walski, Stephen J. Draus ........................................ 841

Sulfur Acidic Lakes in Germany: What has to be Done?
Helmut Klapper, Walter Geller, Martin Schultze ................................. 855

Manganese Removal in Saturated Gravel Beds: Obtaining Design Criteria.
F.J. Sikora, G.A. Brodie, L.L. Behrends ........................................ 857

Acidic Stream Mitigation by Limestone Sand Addition.
David L. Brant, Anthony J. Marich, Jr., Keith L. Largent ....................... 858

Performance of a Wetland/Anoxic Limestone Drain Treatment System at the Douglas Abandoned Mine Land Project
P.L. Sterner, J.B. Cliff, J.G. Skousen, A.J. Sexstone ............................... 859

Terry A. Rightnour ................................................................ 860
Passive Treatment of Acid Mine Drainage in Systems Containing Compost and Limestone: Laboratory and Field Results.
G.R. Watzlaf and D.M. Pappas ......................................................... 861

Evaluation of Selected Grasses for the Revegetation of a Coal Slurry Lagoon in Western Kentucky by Direct Seeding.
T.P. Carter, R.I. Barnhisel, B. Gray, J.R. Nawrot ........................................... 861

Constructed Wetland Treatment System for Upper Blackfoot Mining Complex.
F.S. Sanders .................................................................................. 862

ECOLOGY TECHNICAL DIVISION

Silvio Brienza Jr, Luiz Eduardo Dias, Cassio Alves Pereira ........................................ 863

Field Inoculation Rates of Mycorrhizal Fungi in Revegetation of Abandoned Coal Mine Lands.
Robert K. Noyd, F.L. Pfleger .......................................................... 871

Lateral Thinking on Minesite Rehabilitation in Australia.
David J. Williams ........................................................................ 872

Reclamation of the Wasatch Gathering System Pipeline in southwestern Wyoming and northeastern Utah.
D. Strickland, G. Dern, G. Johnson, and W. Erickson ............................................. 872

Case Studies of Ecosystem-Based Approaches to Remediation.
K. Trimble ................................................................................. 873

Abandoned Mined Land Impacts on Water and Sediment Quality, and Invertebrate Assemblages in Two Virginia Watersheds.
J.L. Yeager, J.R. Bidwell, D.S. Cherry, C.E. Zipper ............................................. 874

Revegetation Standards for Floodplain Forest Ecosystems in western Washington, USA.
B. Zamora ................................................................................. 875
SESSION 1: CONTAINMENT AND MITIGATION OF TOXIC MINE WASTE

Oxygen Transport and Pyrite Oxidation in Unsaturated Coal-Mine Spoil.
Weixing Guo, Charles A. Cravotta III .................................................. 3

Pumped Co-Disposal of Black Coal Washery Wastes in Australia.
David J. Williams ................................................................. 15

Site Characterization and Containment/Remediation of Acid Mine Drainage at an Abandoned Mine Waste Dump.
Fred Djahanguiri, James Snodgrass, John Koerth ........................................ 23
